94%↑

94%↑

Low scorers are more likely to: Perform poorly in jobs requiring thinking; Have difficulty learning; Overlook or not perceive problems; Misunderstand situations, people and complex information; Become confused or overwhelmed; Lack good judgment; Use gut feelings to solve problems; Believe in logical fallacies; Make decisions based on inadequate consideration; Choose ineffective solutions.

High scorers are more likely to: Perform better in jobs requiring thinking and problem solving; Learn difficult new information easily; Recognize and understand problems; Determine the cause of problems; Use logic to solve problems; Distinguish facts from feelings and assumptions; Determine the truthiness of information; Collect information needed to answer questions; Perceive patterns in complex data; Evaluate evidence to draw accurate conclusions; Draw accurate deductions from data; Choose effective solutions.

Suggested Interview Questions

Clear Thinking

- Please recall the three most complicated problems you faced where your solutions delivered outstanding value.
- Some problems don't stay solved. Tell me about a solution you tried that needed the most costly re-do later.
